

SPIE—The International Society for Optical Engineering

PROCEEDINGS

Practical Holography VII: Imaging and Materials

Stephen A. Benton
Chair/Editor

1–2 February 1993
San Jose, California

Sponsored and Published by
SPE—The International Society for Optical Engineering

Volume 1914

SPIE (The Society of Photo-Optical Instrumentation Engineers) is a nonprofit society dedicated to the advancement of optical and optoelectronic applied science and technology.

Contents

- vii *Conference Committee*
- ix *Introduction*

SESSION 1 HOLOGRAPHIC STEREOGRAMS

- 2 **Generation of intermediate parallax images for holographic stereograms** [1914-01]
S. Takahashi, Toppan Printing Co., Ltd. (Japan); T. Honda, M. Yamaguchi, N. Ohyama, Tokyo Institute of Technology (Japan); F. Iwata, Toppan Printing Co., Ltd. (Japan)
- 9 **Development of an office holoprinter III** [1914-02]
E. van Nuland, W. C. Spierings, Dutch Holographic Lab. B. V. (Netherlands)
- 15 **Compact prototype one-step Ultragram printer** [1914-03]
M. A. Klug, M. W. Halle, M. E. Lucente, W. J. Plesniak, Media Lab./MIT
- 25 **Phase-added stereogram: calculation of hologram using computer graphics technique** [1914-04]
M. Yamaguchi, H. Hoshino, T. Honda, N. Ohyama, Tokyo Institute of Technology (Japan)

SESSION 2 HOLOGRAPHIC TECHNIQUE

- 34 **Robot for recording analog multifacet holograms** [1914-05]
M. Monti, Swiss Federal Institute of Technology (Switzerland)
- 41 **Plate optics prepared for making two-step Lippmann holograms** [1914-06]
M. Suzuki, Nagoya College of Creative Arts (Japan); N. Kataoka, Y. Munakata, Chuo Precision Industrial Co., Ltd. (Japan)
- 50 **Construction of a 100-metric-ton holographic table** [1914-07]
L. Pflug, Swiss Federal Institute of Technology (Switzerland); M. Pedretti, Istituto Macchanica dei Materiali S. A. (Switzerland)

SESSION 3 HOLOGRAPHIC MATERIALS

- 56 **Capacity considerations for multiplexed holographic optical data storage** [1914-09]
A. Aharoni, M. C. Bashaw, L. B. Hesselink, Stanford Univ.
- 66 **Novel photopolymer system and its application to color hologram** [1914-10]
M. Kawabata, A. Sato, I. Sumiyoshi, Nippon Paint Co., Ltd. (Japan); T. Kubota, Kyoto Institute of Technology (Japan)
- 75 **Holograms in the edge-illumination geometry: new materials development** [1914-11]
N. J. Phillips, C. Wang, Z. A. Coleman, Loughborough Univ. of Technology (UK)
- 82 **Using thick DCG, 30–100 μm** [1914-12]
R. D. Ralison, S. R. Schicker, Ralcon Development Lab.

- 91 **Determination of average refractive index of spin-coated DCG films for HOE fabrication** [1914-14]
T. J. Kim, E. W. Campbell, R. K. Kostuk, Univ. of Arizona
- 101 **Dichromated gelatin—some heretical comments** [1914-16]
N. J. Phillips, Loughborough Univ. of Technology (UK); R. D. Ralison, Ralcon Corp.;
C. A. Barnett, Loughborough Univ. of Technology (UK); S. R. Schicker, Ralcon Corp.;
Z. A. Coleman, Loughborough Univ. of Technology (UK)
- 115 **New initiation system for holographic recording material** [1914-17]
C. Zhang, M. Yu, Beijing Institute of Technology (China); Y. Yang, J. Li, E. Wang, Institute of
Photographic Chemistry (China)

SESSION 4 HOLOGRAPHIC APPLICATIONS

- 122 **Computer-generated microlenses with high efficiency** [1914-18]
E. Pawlowski, M. Ferstl, B. Kuhlow, Heinrich-Hertz-Institut für Nachrichtentechnik Berlin
GmbH (FRG)
- 134 **Machine for continuous hologram production** [1914-19]
M. L. Armstrong, D. F. Tipton, DuPont Imaging Systems
- 145 **Diffraction printing methods using volume holograms** [1914-20]
W. J. Gambogi, S. R. Mackara, T. J. Trout, Du Pont Imaging Systems
- 155 **Holographic polarization measurements** [1914-23]
S. A. Aleksandrov, Belarussian Research Institute (Belarus); L. V. Tanin, Institute of
Physics (Belarus)
- 161 **Neural-net concept for fabricating HOE in photoresist** [1914-25]
R.-S. Chang, Y.-J. Hu, C.-S. Lin, National Central Univ. (Taiwan)

SESSION 5 ELECTROHOLOGRAPHY

- 176 **Field-addressed electrohologram** [1914-26]
W. P. Parker, Diffraction, Ltd.
- 188 **Advances in holographic video** [1914-27]
P. St.-Hilaire, S. A. Benton, M. E. Lucente, J. D. Sutter, W. J. Plesniak, Media Lab./MIT
- 197 **Improved experimental holographic movie to estimate picture quality for holographic television** [1914-28]
K. Higuchi, Nippon Telegraph and Telephone Corp. (Japan); J. Ishikawa, S. Hiyama, Tama Art
Univ. (Japan)
- 206 **Information reduction by limited resolution for electroholographic display** [1914-30]
H. Yoshikawa, K. Sasaki, Nihon Univ. (Japan)
- 212 **Electronic display system using LCD, laser diode, and holography camera** [1914-31]
H. Katsuma, Tama Art Univ. (Japan); K. Sato, Shonan Institute of Technology (Japan)

- 219 **IC vision: a VLSI-based holographic display system** [1914-32]
J. H. Kulick, S. T. Kowel, T. Leslie, Univ. of Alabama in Huntsville; R. Ciliax, U. S. Army
Missile Command
- 230 **Folding time into space: novel approaches to integral holography** [1914-34]
D. K. Vila, Gesellschaft für Mathematik und Datenverarbeitung
- 237 *Addendum*
- 238 *Author Index*
