

Characterization of PVA doped with different metallic salts as conductor polymer and as holographic film sensitized with ammonium dichromate

Polyelectrolyte as holographic recording medium

Organic photoluminescent holograms

Photopolymers containing epoxy monomers for holographic recording

Pulsed holographic gratings in azo-polymethacrylates with different molecular architectures

Quasi in situ microscopic study of hologram build-up in  $\text{LiNbO}_3$  crystals

Study for Bragg detuning effect and asymmetry of diffraction efficiency on the transmission and the reflection hologram

Measurement of refractive index of photopolymer for holographic gratings

Electro-optical characteristics of holographic replication using a photopolymer and  $\text{ZnCl}_2$

Polarization experiments in holographic interferometry

Problem of twin-image elimination in 2D computer synthesized hologram

Adaptive optics for holographic data storage

Novel diffraction grating light guide for LED backlight

Holographic wavefront sensor : fast sensing no computing

Harmonically related gratings-based quadrature phase interferometers

Holographic video display based on guided-wave acousto-optic devices

Ethereal presences in holography and photography

Method of reduction of zeroth order intensity in computer generated holograms by use of phase addition technique

Full-color image-plane holographic video display

Quality evaluation of full color hologram

Simultaneous recording of practical 3D color images by phase-shifting in-line holography

Digital holographic tomograph : the tool for microelements investigation

Computer-generated holograms allowing 360-degree viewing

Three-dimensional TV using holographic stereogram

A system of enlarging visual field and viewing zone simultaneously for electro-holography

Holographic display system using combination of exchangeable holograms and intelligent illuminations

Event driven illumination system for image reconstruction of hologram

Development of lighting system for hologram using high power LEDs

Holographic data calculating algorithm and new digital hologram recorder

Optical encryption of binary data information with 2-step phase-shifting digital holography

Computer generated hologram for phase-only optical encryption

Chirp volume grating recorded in photopolymer for the optical demultiplexer

Field-of-view extender for a novel camera system

Photoluminescent conductor polymer holograms

Holograms in colored dichromate gelatin with natural colorant

Processing techniques for quality improvement of phase added stereogram

Polyvinyl alcohol and crystal violet as photosensitive film
